

# SABIC'S CERTIFIED LOW CARBON PORTFOLIO

## CARBON NEUTRALITY PLEDGE

In line with our sustainability commitment to our stakeholders, the launch of SABIC's new certified low carbon product portfolio will help support our customers and value chain to achieve their sustainability goals when looking for products with lower product carbon emissions.

The first product in the portfolio will be methanol, manufactured at SABIC's Joint Ventures' methanol production sites.

More certified low carbon products in SABIC's global portfolios will be rolled across the company's worldwide asset base.

## NEW CERTIFIED LOW CARBON PORTFOLIO

- Lower carbon content than SABIC's traditional portfolio
- Same high quality product specifications
- Lower carbon footprint due to using captured CO<sub>2</sub> as a raw material
- By-product CO<sub>2</sub> is captured from upstream processes, providing a valuable source of carbon needed to manufacture the products

Certified low carbon methanol can typically be used in maritime fuel, resins for laminate flooring and acrylic sheets.
