Automotive flammability

Dear Madam / Sir,

Based on practical experience, having tested standard injection molded plaques according to ISO 3795, we can state that all CYCOLACT™, CYCOLOY™, GELOY™, LEXAN™, VALOX™, XENOY™, XYLEX™ resins compounds, as manufactured by SABIC, will typically perform in accordance with the horizontal burning rate requirements of Federal Motor Vehicle Safety Standard No. 302 – “Flammability of Interior Materials” (“FMVSS 302”).

Burning rate < 100 mm/min.

Please be aware that flammability test results on actual final parts may differ due to processing conditions and/or part design. It is your responsibility to determine whether or not the flammability performance of the final part conforms to “FMVSS 302”.

Yours sincerely,

edwin verhorst
